# 150mm base cabinet

## equipment required

- · Cordless drill
- Drill bits:
  No 2 screw tip, 4mm bit, No 12 countersinking bit
- 65mm wood screw
- Wall fixing (only if fixing cabinet to wall)
- Tape measure
- Adjustable square
- Spirit level
- · Quick release clamps
- Pencil
- Safety gear:
  Safety glasses, ear muffs, dust mask

#### important tips

- Plumbing and electrical work must be carried out by a licenced trades person.
- Assemble on a soft surface to ensure the cabinetry doesn't get scratched.
- · Wear appropriate safety gear during assembly.
- To securely mount the cabinets on a stud wall, use at least 8-gauge screws that are 65mm in length.
   However, if your wall is made of concrete, brick, or a different material, consult with an expert to determine the appropriate fastening method.
- Remove any protective wrapping before getting started

# assembly instructions

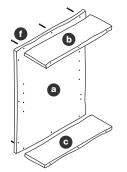

# step 1

### cabinet assembly

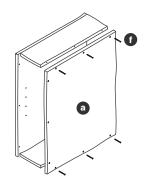

1

Attach the top panel **(b)** and bottom panel **(c)** to one of the side panels **(a)** using 50mm wood screws **(f)**.

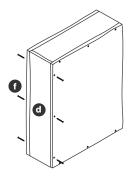

2

Attach the remaining side panel (a) to the top and bottom panels using 50mm wood screws (f).

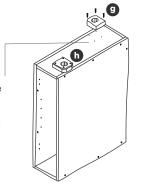

3

Attach the back panel (d) using 50mm wood screws (f).

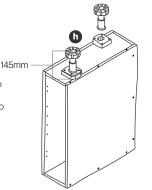

4

Locate the 2 groups of pre-drilled holes on the bottom panel & attach both adjustable leg plates (h) using 28mm wood screws (g).

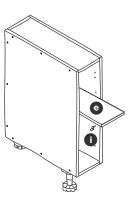

Attach both legs **(h)** to the plates and adjust the height of the legs to 145mm.

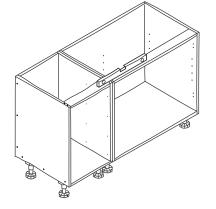

- a. Turn your cabinet upright and insert the 4 plastic shelf supports (i) at your desired shelf height.
- b. Slide the shelf (e) into position, resting on the supports.

# step 2

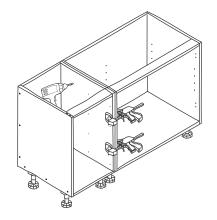

## joining the cabinets

Check your cabinets are level.

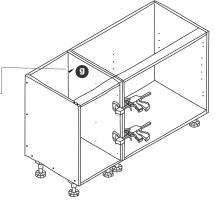

2

Clamp cabinets using quick release clamps. Once secured, pre-drill screw holes.

Attach the cabinets together using using 28mm wood screws (g).

# step3

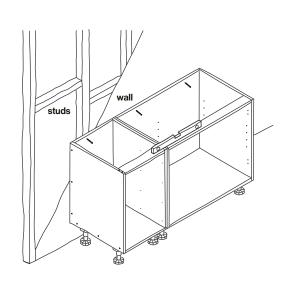

## securing cabinets to wall

# step 4

## attaching the door

Check again that all of your cabinets are level. If you have a plasterboard wall, attach cabinets using timber screws that are at least 65mm in length. Ensure each screw is inserted through a timber stud.

If your walls are made of another material eq. brick, concrete, steel etc, obtain professional advice on the best way to safely attach your cabinets.

- a. Clip the hinge plates onto the door panel
- b. Push down to clip hinge together securely
- c. Adjust the screws to align the doors and add extra screws once door is positioned correctly.
